PROFESSIONAL SUMMARY

Recent graduate with a strong foundation in Data Analysis, UI/UX, and Software Development. Skilled in analyzing data, solving complex problems, and developing practical, and data-driven solutions. Eager to contribute to innovative teams while continuously expanding my technical expertise and delivering meaningful impact.

EDUCATION

Bachelor of Information Technology
Saudi Electronic University | Graduated: Aug 2026

EXPERIENCE

Cooperative Training Intern Jun 2026 – Aug 2026
King Abdulaziz City for Science and Technology (KACST) Development of a Smart City Standards Intelligence Platform by collecting, cleaning, and organizing data using Excel. developing interactive dashboards with Python, Streamlit, and Plotly, Pandas and SQLite and collaborating with the team using GitHub.

PROJECTS

Smart City Standards Intelligence Platform (KACST) Developed an end-to-end decision-support platform for assessing smart city initiatives using international indicators, featuring maturity scoring, gap analysis, evidence tracking, project comparison, data-readiness assessment, and interactive dashboards. Built the database, backend, frontend, and data visualizations using Python, Streamlit, Pandas, Plotly, SQLite, Git, and GitHub**.**

Graduation Project – Green Saudi Initiative App Developed a mobile application supporting the Green Saudi initiative using Flutter and Dart for the frontend and Python for the backend. Implemented secure authentication, VR-based interactive features, blockchain for data integrity, database integration, and intuitive UI/UX design to enhance user experience.

Front-End Project – FinTa (AMD Hackathon)
Developed the front-end of FinTa, an educational platform designed to support finance and accounting students. Built responsive user interfaces using HTML, CSS, and JavaScript, collaborated with the team through GitHub, and used Visual Studio Code for development.

UI/UX Project – My Best Version App | نسختي الأفضل *(Figma Design)*
Designed a mobile application focused on self-development and goal tracking. Conducted problem analysis and performed user testing on a group of participants to identify common challenges in self-development. Applied the full UX design process including user journey mapping, user flow design, wire framing, UI kit creation, and high-fidelity design to deliver an intuitive and user-centered experience.

SKILLS

- Technical Skills: Python, SQL, Streamlit, Excel, Power BI, HTML, CSS, JavaScript, GitHub, VS Code, Figma, UI/UX.
- Soft Skills: Problem-solving, Team Collaboration, Fast Learner.
